**UNIVERSITY OF JAMMU**
**Four Year Innovative Undergraduate Program**
**(Design Your Degree)**
**B.A/B.Sc (Geography)**
**Semester V**
**(For the session 2026, 2027, 2028)**

Course Code: UMJDGT-511
Credits: 04
Contact Hours: 60

Course Title: Physical Geography
Maximum Marks : 100
Internal Evaluation : 40
External Evaluation : 60

**COURSE DESCRIPTION:**
This course provides a comprehensive understanding of fundamentals of Physical Geography. Students will learn the basic aspects of Geography. They will also comprehend the different hypothesis and theories pertaining to the origin of solar system and the Earth. The course develops an understanding about the internal structure of the Earth and its geometry. It also provides a theoretical and empirical framework for understanding Earth movements and landscape evolution. The course also provides understanding about major earth feature and landforms including rocks, mountains, plains and plateaus.

**LEARNING OUTCOMES:**
By the end of this course, students will be able to:
1. Understand the basics of Geography, divisions of Geography, Geography as spatial and social science and key themes in Geography including location, place, region and human environment.
2. Comprehend and explain the origin of the solar system and the Earth based on hypothesis and theories.
3. Explain the interior of the Earth on the basis of seismic waves.
4. Understand the geometry of the Earth including latitude, longitude, time zones, size and shape of the Earth, Earth-Sun geometry, and rotation and revolution.
5. Comprehend the different theories pertaining to the Earth movement and will also be able to explain the major Earth features and landforms.

**MODULE 1: INTRODUCTION TO GEOGRAPHY**

Definition, nature and scope of Geography; Divisions of Geography; Relationship of Geography with other disciplines; Geography as Spatial and Social Science; Key themes in Geography: Location, Place, Region, Human-Environment.

**Hands-On Activities:**
1. Observe and document how a local space functions simultaneously as a physical (spatial) environment and a cultural (social) arena.
2. Identify coordinates of major world cities and plot them on a blank world map.
3.Quantify and evaluate local evidence of human adaptation, modification, and dependency on the environment.

**UNIVERSITY OF JAMMU**
**Four Year Innovative Undergraduate Program**
**(Design Your Degree)**
**B.A/B.Sc (Geography)**
**Semester V**
**(For the session 2026, 2027, 2028)**

Course Code: UMJDGT-511 Course Title: Physical Geography
Credits: 04 Maximum Marks : 100
Contact Hours: 60 Internal Evaluation : 40
External Evaluation : 60

## MODULE 2: ORIGIN OF THE SOLAR SYSTEM AND THE EARTH

Nebular Hypothesis; Planetesimal Hypothesis; Tidal Hypothesis; The Interstellar Dust Hypothesis, Big Bang Theory.

**Hands-On Activities:**

1. Compare scientific theories related to origin of the Solar system and the Earth critically.
2. Connect classroom theories with scientific visualization.

## MODULE 3: INTERIOR AND GEOMETRY OF THE EARTH

Latitude, Longitude, Time Zones and International Date Line; Size and Shape of the Earth; Earth-Sun Geometry: Rotation and Revolution, Earth's Axis Tilt and Solar Altitude; Seismic Waves and Interior of the Earth; Layers and Properties of Earth's Interior.

**Hands-On Activities:**
1. Understand Earth's shape and representation, compare Globe, flat maps and satellite images.
2. Explain seasonal variations on the Earth surface scientifically.

## MODULE 4: EARTH MOVEMENTS

Continental Drift; Sea-Floor Spreading; Plate Tectonics; Earthquakes and Volcanoes; Folds and faults.

**Hands-on Activities:**

1. Compare folding and faulting process and demonstrate them using simple model.

## MODULE 5: MAJOR EARTH FEATURES AND LANDFORMS

Types and Characteristics of Rocks (Igneous, Sedimentary and Metamorphic); Characteristics, Types and distribution of Mountains, Characteristics and Types of Plains; Characteristics and Types of Plateaus.

**Hands-on Activities:**
1. Visit Wadia Museum of Natural History/Department of Geology, University of Jammu to identify different rocks and their characteristics.
2. Understand the contour map and draw different profiles with the help of topographic sheet to visualise the landforms.

**UNIVERSITY OF JAMMU**
**Four Year Innovative Undergraduate Program**
**(Design Your Degree)**
**B.A/B.Sc (Geography)**
**Semester V**
**(For the session 2026, 2027, 2028)**

Course Code: UMJDGT-511 Course Title: Physical Geography
Credits: 04 Maximum Marks : 100
Contact Hours: 60 Internal Evaluation :40
External Evaluation : 60

**MINOR PROJECTS DURING THE SEMESTER:**

1. Study the rock types of nearby area and explain their characteristics as well as compare the physical properties.
2. Study the human-environment relationship in your local area.
3. Map the History and distribution of earthquakes and volcanoes.
4. Explain the significance of map projections in Geography and present classification of map projections.

**PEDAGOGY:**

The introduction of philosophical, conceptual and methodological foundations shall form the core of teaching and learning. The students are to be encouraged to have active interactions with the teacher and the peer group. The learning shall be based on creative assignments, interactive & innovative activities, discussions and learning by doing activities including presentations and practical exercises to enhance their learning.

**GUIDELINES FOR ASSESSMENT AND EVALUATION FOR SEMESTERS V - VIII OF FYUGP (DYD)**

**1. Assessment and Evaluation Model**

Features of this Model of Assessment and Evaluation are:

- Domain knowledge: Tested through class tests and end-sem examination.
- Creativity: Assignments, seminars, open-ended examination questions.
- Hands-on experience: Practical tasks and project work to build real-world problem-solving skills.

Following scheme of assessment and evaluation shall be followed for the last two years of FYUGP (DYD):

**1.1 Continuous Internal Assessment (CIA) - 40 Marks**

This ensures sustained engagement and assessment beyond the final exam. CIA shall have the following components:

- Class Tests and Quizzes (10 Marks): This shall focus on concepts clarity, analytical ability comprising 2 or 3 short written or online tests.
- Assignments and Creative Tasks (10 Marks): This shall be focused on Problem-solving or reflective assignments and Open-ended questions to assess creativity.

**UNIVERSITY OF JAMMU**
**Four Year Innovative Undergraduate Program**
**(Design Your Degree)**
**B.A/B.Sc (Geography)**
**Semester V**
**(For the session 2026, 2027, 2028)**

Course Code: UMJDGT-511 | Course Title: Physical Geography
Credits: 04 | Maximum Marks : 100
Contact Hours: 60 | Internal Evaluation : 40
External Evaluation : 60

- Practical and Hands-on Activities (15 Marks): This shall have the activities like Lab work, field tasks, design exercises, case study etc.
- Seminar and Presentation (5 Marks): This shall have individual or group presentation to be evaluated for communication, originality, creativity, and depth.

**1.2 End-Semester Examination - 60 Marks**

This is designed to test comprehensive domain knowledge and applications. The question paper shall have three sections:

- Section A - 20 Marks: Short answer questions to test fundamentals and breadth of domain knowledge.
- Section B - 20 Marks: Problem-solving and applications of the domain knowledge. The problems need to be conceptual numerical and case-based related to real world applications.
- Section C - 20 Marks: This is to be devoted to essay/analytical questions (choice-based) and have to be Open-ended, requiring synthesis, critical thinking, and creativity.

**Contact Hours:** 60

**Course Title:** Geographical Thought
**Maximum Marks:** 100
**Internal Evaluation:** 40
**External Evaluation:** 60

## COURSE DESCRIPTION

This course introduces students to the development and evolution of geographical thought from ancient to modern times. The course explains the major ideas, concepts and approaches in Geography and highlights the contribution of important geographers. Students will learn about different schools of geographical thought including determinism, possibilism and modern approaches in Geography. The course also helps students understand how geographical ideas are applied in studying present-day social and environmental issues.

## LEARNING OUTCOMES

By the end of this course, students will be able to:

1. Understand the meaning, nature and development of geographical thought.
2. Explain important concepts such as space, region, distribution and spatial organization.
3. Describe the contributions of Greek, Roman, Arab and modern geographers.
4. Understand different approaches in Geography such as determinism, possibilism and quantitative geography.
5. Apply geographical ideas and approaches to contemporary social and environmental issues.

## MODULE 1: FOUNDATIONS OF GEOGRAPHICAL THOUGHT

Meaning, nature and scope of Geography; Geography as a discipline; Basic concepts in Geography: Space and Region; Determinism, Possibilism and Neo-determinism; Relationship between Physical and Human Geography.

### Hands-on Activities:

1. Prepare a concept map showing the relationship between space, region and distribution using local examples.

2. Conduct a classroom discussion or debate on Determinism and Possibilism with examples from daily life.

## MODULE 2: CLASSICAL AND MEDIEVAL GEOGRAPHICAL THOUGHT

**UNIVERSITY OF JAMMU**
**Four Year Innovative Undergraduate Program**
**(Design Your Degree)**
**B.A./B.Sc. (Geography)**
**Semester V**
**(For the session 2026, 2027, 2028)**

**Course Code:** UMJDGT-512
**Credits:** 04
**Contact Hours:** 60

**Course Title:** Geographical Thought
**Maximum Marks:** 100
**Internal Evaluation:** 40
**External Evaluation:** 60

Contributions of Greek geographers: Thales, Anaximander and Herodotus; Contributions of Roman geographers: Strabo and Ptolemy; Contributions of Arab geographers: Al Biruni and Ibn Khaldun

**Hands-on Activities:**

1. Prepare a timeline showing important geographical contributions from ancient to medieval periods.
2. Compare ancient and modern world maps to understand changing geographical knowledge.

**MODULE 3: DEVELOPMENT OF MODERN GEOGRAPHY**

Contributions of Alexander von Humboldt and Carl Ritter; Environmental Determinism and Friedrich Ratzel; Possibilism and Vidal de la Blache; Contributions of Hettner, Hartshorne and Mackinder.

**Hands-on Activities:**

1. Prepare a comparison chart showing the ideas and contributions of major geographers.
2. Conduct a field observation to study the relationship between environment and human activities in a nearby area.

**MODULE 4: CONTEMPORARY APPROACHES IN GEOGRAPHY**

Quantitative Revolution and Spatial Science; Behavioral and Humanistic Geography; Radical and Welfare Geography; Feminist and Postmodern Geography; Modern relevance of geographical thought.

**Hands-on Activities:**

1. Interpret simple maps and spatial data using online maps or GIS platforms.
2. Discuss contemporary issues such as climate change, urban problems or gender inequality using different geographical approaches.

**MODULE 5: INDIAN CONTRIBUTIONS TO GEOGRAPHICAL THOUGHT**

**UNIVERSITY OF JAMMU**
**Four Year Innovative Undergraduate Program**
**(Design Your Degree)**
**B.A./B.Sc. (Geography)**
**Semester V**
**(For the session 2026, 2027, 2028)**

**Course Code:** UMJDGT-512
**Course Title:** Geographical Thought
**Credits:** 04
**Maximum Marks:** 100
**Contact Hours:** 60
**Internal Evaluation:** 40
**External Evaluation:** 60

Indian Geographical Thought; Development of Geography in India; Contributions of Indian Geographers; Contemporary Indian Geographical Perspectives; Relevance of Indian Geographical Thought to Contemporary Geographical Issues.

**Hands-on Activities:**

1. **Prepare a profile of an Indian geographer** and critically examine his/her major contribution to geographical thought through a short presentation, timeline or concept map.
2. **Apply an Indian geographical approach to a contemporary issue**—such as regional inequality, tribal development, urbanisation, climate change or gender inequality—using a simple map, GIS platform, census data or other spatial data.

**MINOR PROJECTS DURING THE SEMESTER**

1. Evolution of Geographical Thought from ancient to modern times.
2. Comparative study of Determinism and Possibilism in a selected region.
3. Application of modern geographical approaches in studying environmental or social problems.

**PEDAGOGY**

The course shall focus on conceptual understanding and interactive learning through discussions, maps, presentations and activity-based teaching. Students shall be encouraged to participate in debates, assignments, seminars and field observations to understand the development of geographical ideas in a simple and practical manner.

**GUIDELINES FOR ASSESSMENT AND EVALUATION FOR SEMESTERS V–VIII OF FYUGP (DYD)**

**1. Assessment and Evaluation Model**

Features of this model of Assessment and Evaluation are:

- Domain Knowledge: Tested through class tests and end-semester examination.
- Creativity: Assignments, presentations and open-ended questions.
- Hands-on Experience**:** Field observations, map interpretation and project work.

**1.1 Continuous Internal Assessment (CIA) – 40 Marks**

The Continuous Internal Assessment shall include:

**UNIVERSITY OF JAMMU**
**Four Year Innovative Undergraduate Program**
**(Design Your Degree)**
**B.A./B.Sc. (Geography)**
**Semester V**
**(For the session 2026, 2027, 2028)**

**Course Code:** UMJDGT-512 **Course Title:** Geographical Thought

**Credits:** 04 **Maximum Marks:** 100
**Contact Hours:** 60 **Internal Evaluation:** 40
**External Evaluation:** 60

- Class Tests and Quizzes (10 Marks): To assess conceptual understanding and analytical ability.
- Assignments and Creative Tasks (10 Marks): Reflective and activity-based assignments.
- Practical and Hands-on Activities (15 Marks): Map work, field observation and data interpretation.
- Seminar and Presentation (5 Marks): Individual or group presentations.

**1.2 End-Semester Examination – 60 Marks**

The question paper shall consist of three sections:

- Section A – 20 Marks: Short answer questions testing basic concepts.
- Section B – 20 Marks: Analytical and application-based questions.
- Section C – 20 Marks**:** Essay and open-ended analytical questions with internal choice.

**RECOMMENDED TEXTBOOKS**

Course Code: UMJDGT-513
Credits: 04
Contact Hours: 60

Course Title: Human Geography
Maximum Marks : 100
Internal Evaluation : 40
External Evaluation : 60

**COURSE DESCRIPTION:**
Human Geography explores the dynamic relationship between human societies and the natural world. This course investigates the spatial logic behind cultural, economic, and political systems, analyzing how human activity transforms physical landscapes into meaningful places. Students will examine the global processes from urbanization to globalization that shapes our interconnected world.

**LEARNING OUTCOMES:**
By the end of this course, students will be able to:
1. Analyze the causes, regional trends, and socioeconomic consequences of National, international and domestic migration.
2. Human geography equips students to understand spatial relationships, evaluate human-environment interactions, and analyze global socioeconomic patterns.
3. Understand global human population patterns, densities, and growth characteristics.
4. By exploring how human communities, cultures, and economies interact across different spaces, learners develop a deep spatial awareness and critical analytical skills.

**MODULE 1: FOUNDATIONS OF HUMAN GEOGRAPHY**
Introduction to Human Geography; Approaches to study Human Geography Regional and Systematic Geography, Dualism; Nature of Human Geography

**Hands on Activities**:
1. Data collection of population and climate and prepare maps.
2. Plot the locations on an open-source map layer (such as Google Maps).

**MODULE 2: POPULATION DISTRIBUTION, DENSITY AND GROWTH**
Population-distribution and density; Factors influencing the distribution of population; Population Growth; Components of Population change; Demographic Transition

**Hands on Activities**:
1. Prepare population density and distribution maps.
2. Find the high and low density towns and cities on google earth and prepare the maps.

**MODULE 3: HUMAN SETTLEMENTS**
Rural settlements: types and distribution; Urban settlements-types, distribution; Evolution of Towns in India; Urbanisation in India; Functional Classification of Towns

**UNIVERSITY OF JAMMU**
**Four Year Innovative Undergraduate Program**
**(Design Your Degree)**
**B.A/B.Sc (Geography)**
**Semester V**
**(For the session 2026, 2027, 2028)**

Course Code: UMJDGT-513 Course Title: Human Geography
Credits: 04 Maximum Marks : 100
Contact Hours: 60 Internal Evaluation : 40
External Evaluation : 60

**Hands on Activities**:
1. Create an empirical visual proof showing how physical geography determines global human settlement boundaries.
2. Use high-resolution satellite imagery to identify, classify, and mathematically analyze a rural settlement's layout.

**MODULE 4: HUMAN ACTIVITIES**

Human races: Types and Distribution, Occupations, Important Tribes: Eskimo, Khasi, Santhal, Gond and Bushman; Economic Classification: Primary, secondary, tertiary and quaternary spatial activities.

**Hands on Activities**:
1. Find the human races distribution on world map**.**
2. Areas of subsistence gathering: Major areas of nomadic herding of the world; Major areas of commercial livestock rearing.

**MODULE 5: TRANSPORT AND COMMUNICATION**

Means of transport: Land (Road transport, Rail transport and Oil and Gas pipelines), Water transport (Inland waterways and Oceanic routes) and Air transport; Communication Networks- Personal and Mass Communication Systems

**Hands on Activities**:
1. Plot the roads and railway lines on an open-source map layer (such as Google Maps).
2. Calculate the length of the roads and railways from your study area.

**MINOR PROJECTS DURING THE SEMESTER:**

1. Brief profile of the study area (geographical location, coordinates, boundary map).
2. Data collection methods (Primary survey details, or Secondary sources)
3. To trace the land-use changes in the area over the last 10–20 years using satellite imagery.
4. To map the geographical distribution and total area of public green spaces within the study zone.

Course Code: UMJDGT-514 Course Title: Regional Geography of India

Credits: 04 Maximum Marks : 100
Contact Hours: 60 Internal Evaluation : 40
External Evaluation : 60

**COURSE DESCRIPTION:**
This course provides a comprehensive understanding of regional Geography of India. Students will learn the Various dimensions of the geographical features of India and their spatial distribution. They will also analyse the distribution of natural resources as well as the different agricultural practices in the country. The course will develop an understanding of population characteristics such as distribution, growth, migration and urbanisation. Students will also be able to understand the recent population policy of India and regional disparities and planning in the country. The course will also give exposure to the distribution of major industries and the transportation system in India.

**LEARNING OUTCOMES:**
By the end of this course, students will be able to:
1. Develop in-depth understanding of India's physical setting, features and climate and how these factors influence regional development.
2. Understand the distribution of natural resources and agricultural landscape of India and their role in regional development of the country.
3. Explain India's population distribution, growth, the process of urbanization, and migration, along with the factors driving these trends.
4. Comprehend the distribution and localization factors of key industries in India. Understand the transportation networks of India, including rail, road, air, and water, and their role in the economic integration and development of the country.

**MODULE 1: PHYSIOGRAPHY OF INDIA**

India's geopolitical position in South Asia, Physiographic Divisions of India, Climate of India, Mechanism of Indian Monsoon, Jet Streams, Drainage System of India

**Hands-On Activities:**
1. Prepare isopleth maps of India showing temperature and rainfall by using latest data.
2. Explain the significance of geopolitical position of India with the help of detail map.

**MODULE 2: NATURAL RESOURCES OF INDIA**

Soils (Types, Characteristics and Distribution), Vegetation (Types, Characteristics and Distribution), Mineral Resources: Iron Ore, Manganese, Mica and Copper; Power Resources: Coal and Petroleum.

**Hands-On Activities:**

1. Draw a distribution map of different mineral resources of India using Google Earth.

**UNIVERSITY OF JAMMU**
**Four Year Innovative Undergraduate Program**
**(Design Your Degree)**
**B.A/B.Sc (Geography)**
**Semester V**
**(For the session 2026, 2027, 2028)**

Credits: 04 Maximum Marks : 100
Contact Hours: 60 Internal Evaluation : 40
External Evaluation : 60

2. Empirically study the soil quality and characteristics of Kandi area and plain area of Jammu district.

**MODULE 3: AGRICULTURE IN INDIA**

Cropping pattern and farming system; Green Revolution in India: Impact and Problems; Major Cereal Crops: Wheat and Rice (Distribution and Production); Major Cash Crops: Cotton, Tea (Distribution and Production).

**Hands-On Activities:**

1. Prepare choropleth maps showing spatial patterns of wheat and rice in India using latest available data in GIS.
2. Map the spatial dimensions of Green Revolution in India using geospatial technology and explain its associated factors.

**MODULE 4: POPULATION IN INDIA**

Population distribution and growth in India, Recent Population policy of India, Migration and Urbanization trends; Regional disparities and planning.

**Hands-On-Activities:**

1. Show population distribution of India with the help of dot map for 2001 and 2011 census data using Q GIS/Arc GIS.
2. Prepare a latest map of regional disparity at the level of development in India based on different indicators by applying composite index.

**MODULE 5: INDUSTRIES AND TRANSPORT IN INDIA**

Industries: Distribution and localization factors of major industries Iron and Steel; and Textiles Industry; Transport: Rail, Road, Airways and Waterways.

**Hands-on Activities:**

1. Show the major iron and steel industries on the map of India and explain the drivers associated with their location.
2. Locate the major waterways of India on the map.

**MINOR PROJECTS DURING THE SEMESTER:**

1. Population density and resource pressure in India.

**UNIVERSITY OF JAMMU**
**Four Year Innovative Undergraduate Program**
**(Design Your Degree)**
**B.A/B.Sc (Geography)**
**Semester V**
**(For the session 2026, 2027, 2028)**

Course Code: UMJDGT-514 Course Title: Regional Geography of India

Credits: 04 Maximum Marks : 100
Contact Hours: 60 Internal Evaluation : 40
External Evaluation : 60

2. Role of transport networks in industrial growth in India.
3. Climate change and monsoon variability in India.

**PEDAGOGY:**

Use of visual aids especially maps. Students should be encouraged to use an atlas in the classroom. Audio-visual shows on different parts of India. Discussions and assignments.

| Contact Hours: 60 | Internal Evaluation : 40 |
| | External Evaluation : 60 |

- Seminar and Presentation (5 Marks): This shall have individual or group presentation to be evaluated for communication, originality, creativity, and depth.

**1.2 End-Semester Examination - 60 Marks**

This is designed to test comprehensive domain knowledge and applications. The question paper shall have three sections:

- Section A - 20 Marks: Short answer questions to test fundamentals and breadth of domain knowledge.

- Section B - 20 Marks: Problem-solving and applications of the domain knowledge. The problems need to be conceptual numerical and case-based related to real world applications.

- Section C - 20 Marks: This is to be devoted to essay/analytical questions (choice-based) and have to be Open-ended, requiring synthesis, critical thinking, and creativity.

Course Title: Geomorphology
Maximum Marks: 100
Internal Evaluation: 40
External Evaluation: 60

## COURSE DESCRIPTION

This course introduces students to the fundamentals of Geomorphology and the processes responsible for the development of landforms on Earth's surface. The course explains the internal and external forces shaping the Earth and provides understanding about weathering, erosion, mass movement and geomorphic cycles. Students will also learn about various landforms produced by rivers, glaciers, wind and underground water. The course develops basic knowledge regarding geomorphic hazards and their significance in environmental management.

## LEARNING OUTCOMES

By the end of this course, students will be able to:

1. Understand the meaning, nature and scope of Geomorphology and its relationship with Geography.
2. Explain the structure of the Earth, geological time scale and fundamental concepts of geomorphology.
3. Understand the role of endogenic and exogenic processes in landform development.
4. Describe the processes and landforms associated with rivers, glaciers, wind and karst regions.
5. Identify geomorphic hazards and understand the importance of geomorphology in environmental management and planning.

## MODULE 1: INTRODUCTION TO GEOMORPHOLOGY

Definition, nature and scope of Geomorphology; Relationship of Geomorphology with Geography and Geology; Earth structure and geological time scale; Fundamental concepts: Uniformitarianism and Catastrophism; Concept of Morphogenetic Regions.

**Hands-on Activities:**

1. Prepare a geological time scale showing major eras and periods.
2. Draw diagrams/models showing the internal structure of the Earth.

Credits: 04
Contact Hours: 60

Course Title: Geomorphology
Maximum Marks: 100
Internal Evaluation: 40
External Evaluation: 60

## MODULE 2: ENDOGENIC PROCESSES AND STRUCTURAL LANDFORMS

Plate Tectonics: concept and plate boundaries; Earth movements: folding and faulting; Volcanoes and earthquakes; Isostasy and mountain building

**Hands-on Activities:**

1. Identify major tectonic plates and plate boundaries on a world map.
2. Prepare simple models demonstrating folding and faulting processes.

## MODULE 3: EXOGENIC PROCESSES AND FLUVIAL LANDFORMS

Weathering: physical, chemical and biological; Mass wasting and slope development; River erosion, transportation and deposition; Fluvial landforms: waterfalls, meanders, flood plains, levees and deltas; Cycle of erosion by Davis.

**Hands-on Activities:**

1. Observe and identify different types of weathering features in nearby areas.
2. Draw diagrams/sketches of important river landforms using maps or photographs.

## MODULE 4: GLACIAL, AEOLIAN AND KARST LANDFORMS

Glacial processes and landforms: cirques, moraines and U-shaped valleys; Aeolian processes and landforms: dunes and loess; Karst processes and landforms: stalactites, stalagmites and sinkholes; Coastal processes and coastal landforms.

**Hands-on Activities:**

1. Identify glacial, desert and karst landforms using photographs or satellite images.
2. Prepare diagrams/models of coastal and desert landforms.

## MODULE 5: APPLIED GEOMORPHOLOGY

Geomorphic hazards: landslides, earthquakes and floods; Human impact on landforms; Geomorphology and environmental management; Importance of geomorphology in river basin planning and sustainable land use.

**B.A./B.Sc. (Geography)**
**Semester V**
**(For the session 2026, 2027, 2028)**

Course Code: UMJDGT-515
Credits: 04
Contact Hours: 60

Course Title: Geomorphology
Maximum Marks: 100
Internal Evaluation: 40
External Evaluation: 60

**Hands-on Activities:**

1. Prepare a simple hazard map of landslide or flood-prone areas.
2. Conduct a case study of a local geomorphic hazard and suggest mitigation measures.

**MINOR PROJECTS DURING THE SEMESTER**

1. Study of landforms in a nearby area and identification of geomorphic processes responsible for their formation.
2. Comparative study of fluvial, glacial or desert landforms using maps and photographs.
3. Assessment of geomorphic hazards in a selected area and their environmental impact.

**PEDAGOGY**

The course shall focus on conceptual understanding and practical learning through maps, diagrams, field observations and simple models. Students shall be encouraged to participate in discussions, presentations, assignments and activity-based learning. Field-based observations and visual interpretation of landforms shall help students understand geomorphic processes in a simple and practical manner.

**GUIDELINES FOR ASSESSMENT AND EVALUATION FOR SEMESTERS V–VIII OF FYUGP (DYD)**

**1. Assessment and Evaluation Model**

Features of this model of Assessment and Evaluation are:

- Domain Knowledge: Tested through class tests and end-semester examination.
- Creativity: Assignments, seminars and open-ended questions.
- Hands-on Experience**:** Practical activities, field observations and project work.

**1.1 Continuous Internal Assessment (CIA) – 40 Marks**

The Continuous Internal Assessment shall include:

**UNIVERSITY OF JAMMU**
**Four Year Innovative Undergraduate Program**
**(Design Your Degree)**
**B.A./B.Sc. (Geography)**
**Semester V**
**(For the session 2026, 2027, 2028)**

Maximum Marks: 100
Internal Evaluation: 40
External Evaluation: 60

- Class Tests and Quizzes (10 Marks): To assess conceptual understanding and analytical ability.
- Assignments and Creative Tasks (10 Marks): Reflective and activity-based assignments.
- Practical and Hands-on Activities (15 Marks): Field observations, diagrams, mapping and model preparation.
- Seminar and Presentation (5 Marks): Individual or group presentations.

### 1.2 End-Semester Examination – 60 Marks

The question paper shall consist of three sections:

- Section A – 20 Marks: Short answer questions testing basic concepts.
- Section B – 20 Marks: Application and analytical questions.
- Section C – 20 Marks**:** Essay and open-ended analytical questions with internal choice.

Course Title: Internship
Maximum Marks: 100
Internal Evaluation: 40
External Evaluation: 60

**Internship Guidelines:**
To foster analytical thinking, problem-solving ability, and application of Geographical knowledge and Remote Sensing & GIS tools in real-world scenarios, students enrolled in the B.A/B.Sc (Geography) program are required to undertake an internship during Semester V as per the following guidelines:

**1. Nature of Internship**
- Students shall undertake an industry-oriented internship in areas such as Information Technology, Remote Sensing, GIS, Artificial Intelligence, or related domains.
- The internship may be carried out in recognized organizations, research institutions, startups, or government/private sector establishments.

**2. Duration**
- The internship shall be of minimum 2 months (8 weeks) duration.
- It shall be completed within the stipulated period as prescribed by the department.

**3. Internship Report**
- At the end of Semester V, students are required to submit a detailed internship report.
- The report must be duly certified by the internship guide/mentor and should include the work carried out, methodology adopted, and outcomes achieved.

**4. Evaluation**
- The internship shall be evaluated at the end of the semester through report assessment and viva voce.
- The evaluation will be conducted jointly, carrying a total of 100 marks, distributed as follows:
    - o Internal Evaluation: 40 Marks
    - o External Evaluation: 60 Marks

**5. Mandatory Requirement**
- Successful completion of the internship and submission of the report is mandatory for progression and award of the degree.
- Non-compliance may lead to withholding of results or requirement to repeat the internship.

**6. Required Documents**
Students shall submit:
- Internship Completion Certificate
- Certified Internship Report
- Any additional feedback/document, if applicable

**Note:**
The internship is expected to reflect the integration of AI technologies and Geospatial technology in addressing real-world problems.

**B.A/B.Sc (Geography)**
**Semester V**
**(For the session 2026, 2027, 2028)**

Course Code: UMJDGP-517
Credits: 06

Course Title : Project 1 (Cross Disciplinary)
Maximum Marks :150
Internal Evaluation : 100
External Evaluation : 50

**Guidelines for Interdisciplinary Major Projects:**

To promote experiential learning, skill development and local to global relevance in line with the essence of the DYD program, one semester-long major project carrying 150 marks from semesters V to VIII shall be undertaken. The Project should cover more than one subject in the domain area of Major. The Project shall be Cross disciplinary in nature.

**1. Objectives:**

i. Integrate theoretical knowledge within the discipline.
ii. Encourage research-oriented and inquiry-driven learning.
iii. Develop analytical, digital, and communication competencies.
iv. Address local, regional, or global developmental challenges.
v. Enhance employability and innovation skills.

**2. Nature and Scope of Projects:**

Projects may include interdisciplinary academic research, cartographic and geospatial techniques. Design thinking and technological solutions, community engagement initiatives, policy analysis of educational innovation and entrepreneurship or sustainability-focused projects. Each project must clearly demonstrate integration of at least two courses of the current semester. Transdisciplinary project in collaboration are also encouraged.

**3. Structure and Supervision:**

A group of 3–5 students shall work on the project where interdisciplinary team formation is encouraged. One Primary Mentor shall guide the project at least one from another discipline(s)/course(s) may be appointed where required. The project shall be conducted over one semester with the following suggested indicators:

1. Proposal Development and Approval
2. Literature Review and Conceptual Framework
3. Methodology Design
4. Implementation/Analysis
5. Mid-Term Review
6. Final Report Submission
7. Presentation and Viva-Voce

**4. Proposal Guidelines:**

Each project proposal shall include

1. Title and thematic area.
2. Courses/disciplines integrated.
3. Problem statement and motivation.
4. Objectives and expected outcomes.
5. Brief literature review.
6. Methodology and tools.

Maximum Marks :150
Internal Evaluation : 100
External Evaluation : 50

7. Timeline with milestones.
8. Ethical considerations (if applicable)

Approval shall be granted by the DYD Academic/Project Committee.

**5. Evaluation Scheme (Credits-06) Marks: 150**

**a) Continuous Assessment – 40 Marks**

| | |
|---|---|
| Proposal quality and originality | 10 |
| Literature review | 10 |
| Methodology planning | 10 |
| Progress, logbook & mentor assessment | 10 |

**b) Final Report – 60 Marks**

| | |
|---|---|
| Problem formulation and clarity | 10 |
| Interdisciplinary integration | 10 |
| Methodology and analysis | 20 |
| Innovation and societal/technological relevance | 10 |
| Writing quality and references | 10 |

**c) Presentation & Viva Voce – 50 Marks**

| | |
|---|---|
| Conceptual understanding | 15 |
| Implementation/results/outcome | 15 |
| Communication skills | 5 |
| Response to questions | 10 |
| Collaboration/team work | 5 |

Students shall submit a hardbound copy of the project report, along with a soft copy containing the PDF of the report and all relevant datasets, source code, and design artefacts. In addition, students must submit the presentation slides prepared for the project evaluation and a duly maintained project diary/logbook certified by the mentor(s).

**6. Academic Integrity and Ethics:**

To meet academic integrity and professional ethics, proper citation and avoidance of plagiarism are mandatory. Also responsible use of AI tools must be declared.

**7. Role of the DYD Project Committee:**

The committee shall approve project proposals, ensure interdisciplinary balance, monitor the progress, standardize evaluation procedures and maintain a repository of DYD projects.

**8. Timeline of the Project:**

The project work is required to be initiated in the following phases:
Week 1–3: Proposal preparation and approval
Week 4–6: Literature review, data collection, and methodology
Week 8–12: Implementation/Analysis
Week 13: Final submission and viva-voce

**9. Outcomes:**

By the end of the 8$^{th}$ semester, the students shall have atleast any one of the following outcomes:
a) Application for Intellectual Property Rights (IPR) such as a design patent, copyright, etc.
b) Submission of a high-quality research article in a Scopus/SCI/SCIE indexed journal, with the manuscript accepted for review/publication.
c) Conversion of the idea into a start-up, including submission of an application to an incubator for start-up support.
