Four Year Innovative Undergraduate Program

(Design Your Degree)

BACHELOR IN ARTS (PSYCHOLOGY)

Semester V

(For the Session 2026, 2027 & 2028)

Course Code: UMJDPT-511 **Course Title: History and Founding Paths of Psychology**

Credits: 04 **Maximum Marks: 100**

Contact Hours: 60 **Internal Evaluation: 40**

External Evaluation: 60

COURSE DESCRIPTION

This course introduces students to the historical evolution of psychology from philosophical roots to contemporary scientific psychology. It explores major intellectual traditions, founding schools, landmark experiments, and influential thinkers that shaped psychology. The course emphasizes experiential and reflective learning through historical simulations, debates, museum projects, archival analysis, role-play, and indigenous perspectives, enabling students to critically evaluate the development of psychological thought across cultures and time periods.

COURSE OBJECTIVES

By the end of the course, students will be able to:

1. Trace the historical development of psychology from ancient to modern times
2. Examine philosophical and scientific foundations of psychology
3. Compare major schools and systems of psychology
4. Evaluate contributions and limitations of key psychologists
5. Explore indigenous and Indian psychological traditions
6. Analyze historical shifts in research methods and ethical standards
7. Develop critical thinking through experiential engagement with historical ideas
8. Connect historical developments with contemporary psychological practices

COURSE OUTCOMES (COs)

Students will be able to:

CO 1: Explain major milestones in the emergence of psychology

University of Jammu

Four Year Innovative Undergraduate Program

(Design Your Degree)

BACHELOR IN ARTS (PSYCHOLOGY)

Semester V

(For the Session 2026, 2027 & 2028)

Course Code: UMJDPT-511 **Course Title: History and Founding Paths of Psychology**

Credits: 04 **Maximum Marks: 100**

Contact Hours: 60 **Internal Evaluation: 40**

External Evaluation: 60

CO 2: Differentiate among structuralism, functionalism, behaviorism, psychoanalysis, Gestalt psychology, and humanistic psychology

CO 3: Critically analyze landmark psychological experiments and their societal impact

CO 4: Analyse the historical contributions and intellectual movements that shaped the emergence and development of psychology as a scientific discipline.

CO 5: Demonstrate historical understanding through projects, presentations, and reflective exercises

CO 6: Apply historical perspectives to contemporary psychological issues

UNIT I: Origins of Psychological Thought

Meaning and scope of history of psychology, Ancient roots of psychological thought, Greek philosophy: Socrates, Plato, Aristotle, Mind-body problem , Rationalism and empiricism, Contributions of: Descart, Locke, Berkeley, Hume

Indian traditions: Concepts of mind in Vedas and Upanishads, Sankhya and Yoga psychology, Buddhist perspectives on cognition and consciousness

Experiential Activities

- Comparative concept mapping of different perspectives : focusing on analytical skills
- Historical timeline exploration: focusing on chronological understanding of psychological thought
- Philosophical dialogue simulation: focusing on development of critical thinking
- Reflective writing: focusing on understanding the conceptions of mind

UNIT II: Emergence of Scientific Psychology

University of Jammu

Four Year Innovative Undergraduate Program

(Design Your Degree)

BACHELOR IN ARTS (PSYCHOLOGY)

Semester V

(For the Session 2026, 2027 & 2028)

Course Code: UMJDPT-511 **Course Title: History and Founding Paths of Psychology**

Credits: 04 **Maximum Marks: 100**

Contact Hours: 60 **Internal Evaluation: 40**

External Evaluation: 60

Scientific revolution and psychology, Psychophysics: Weber, Fechner, Helmholtz and sensory processes, Wilhelm Wundt and Leipzig Laboratory, Introspection as a method, Edward Titchener and Structuralism, William James and Functionalism

Landmark Studies: Reaction time experiments, Sensation and perception studies

Experiential Activities

- Demonstration based exploration of functionalism: focusing on understanding experimental psychology
- Recreation of historical experiments: focusing on understanding scientific methods
- Critical reflection on introspection: focusing on experience and critical thinking
- Historical laboratory visits: focusing on understanding institutional development

UNIT III: Founding Schools of Psychology

Psychoanalysis: Sigmund Freud, Structure of personality, Unconscious processes,Behaviorism: Watson, Pavlov, Skinner Gestalt Psychology: Wertheimer, Köhler, Koffka Humanistic Psychology: Maslow, Rogers, Cognitive Revolution: Information processing approach, Chomsky's critique of behaviorism

Experiential Activities

- Role play simulation: focusing on understanding and evaluation of different perspectives)
- Comparative analysis: focusing on critical thinking
- Structured debates and discussions: focusing on critical thinking and argumentation
- Application in real life: focusing on integrating perspectives

UNIT IV: Psychology across Cultures and Contemporary Developments

University of Jammu
Four Year Innovative Undergraduate Program
(Design Your Degree)
BACHELOR IN ARTS (PSYCHOLOGY)
Semester V
(For the Session 2026, 2027 & 2028)

Course Code: UMJDPT-511 **Course Title: History and Founding Paths of Psychology**

Credits: 04 **Maximum Marks: 100**
Contact Hours: 60 **Internal Evaluation: 40**
External Evaluation: 60

Rise of applied psychology, Educational psychology, Clinical psychology, Industrial psychology, Community psychology, Feminist critiques of psychology, Indigenous psychologies, Indian psychology movement, Psychology in contemporary India, Future directions of psychology

Ethical Developments: Historical ethical issues , Evolution of research ethics

Experiential Activities

- Exploration of psychology in Indian/contemporary contexts: focusing on contextual understanding
- Interaction with practitioners: focusing on connecting history with practice
- Case-based analysis: focusing on applications and critical analysis
- Digital and creative representation: focusing on integrative understanding

Guidelines for Assessment and Evaluation

For

Semesters V - VIII of FYUGP (DYD)

1 Assessment and Evaluation Model

Features of this Model of Assessment and Evaluation are:

- Domain knowledge: Tested through class tests and end-sem examination.
- Creativity: Assignments, seminars, open-ended examination questions.
- Hands-on experience: Practical tasks and project work to build real-world problem-solving skills.

Following scheme of assessment and evaluation shall be followed for the last two years of FYUGP (DYD):

University of Jammu
Four Year Innovative Undergraduate Program
(Design Your Degree)
BACHELOR IN ARTS (PSYCHOLOGY)
Semester V
(For the Session 2026, 2027 & 2028)

Course Code: UMJDPT-511 **Course Title: History and Founding Paths of Psychology**

Credits: 04 **Maximum Marks: 100**
Contact Hours: 60 **Internal Evaluation: 40**
External Evaluation: 60

1.1 Continuous Internal Assessment (CIA) - 40 Marks

This ensures sustained engagement and assessment beyond the final exam. CIA shall have the following components:

- Class Tests and Quizzes (10 Marks): This shall focus on concepts clarity, analytical ability comprising 2 or 3 short written or online tests.
- Assignments and Creative Tasks (10 Marks): This shall be focussed on Problem-solving or reflective assignments and Open-ended questions to assess creativity.
- Practical and Hands-on Activities (15 Marks): This shall have the activities like Lab work, field tasks, case study etc.
- Seminar and Presentation (5 Marks): This shall have individual or group presentation to be evaluated for communication, originality, creativity, and depth.

1.2 End-Semester Examination - 60 Marks

This is designed to test comprehensive domain knowledge and applications. The question paper shall have three sections:

- Section A - 20 Marks: Short answer questions to test fundamentals and breadth of domain knowledge.
- Section B - 20 Marks: Problem-solving and applications of the domain knowledge. The problems need to be conceptual numerical and case-based related to real world applications.
- Section C - 20 Marks: This is to be devoted to essay/analytical questions (choice-based) and have to be Open-ended, requiring synthesis, critical thinking, and creativity.

BACHELOR IN ARTS PSYCHOLOGY
Semester V
(For the Session 2026, 2027 & 2028)

Course Code: UMJDPT-512
Credits: 04
Contact Hours: 60

Course Title: Social Psychology
Maximum Marks: 100
Internal Evaluation: 40
External Evaluation: 60

COURSE DESCRIPTION

This course introduces students to the scientific study of how individuals think, feel, and behave in social situations. It explores the influence of family, peers, culture, groups, media, and society on human behaviour. The course emphasizes experiential learning through observations, simulations, field visits, community engagement, reflective practice, and analysis of contemporary social issues, enabling students to understand social behaviour in real-life contexts and become socially responsible citizens

COURSE OBJECTIVES

By the end of this course, students will be able to:

1. Understand the nature, scope, theoretical perspectives and methods of Social Psychology.

2. Analyse the reciprocal influence of individuals, social situations, groups and cultural contexts on social behaviour.

3. Examine social cognition, attitudes, attribution and processes of social influence.

4. Analyse interpersonal relationships and group processes, including communication, leadership, cooperation, competition and conflict.

5. Critically examine prejudice, stereotyping, discrimination, aggression, prosocial behaviour and other contemporary social issues from a social-psychological perspective.

6. Apply social-psychological principles to analyse real-life social situations and contemporary social problems.

7. Develop skills of observation, inquiry, critical thinking, communication, collaboration and evidence-based interpretation through experiential learning.

University of Jammu

BACHELOR IN ARTS PSYCHOLOGY
Semester V
(For the Session 2026, 2027 & 2028)

Course Code: UMJDPT-512 **Course Title: Social Psychology**
Credits: 04 **Maximum Marks: 100**
Contact Hours: 60 **Internal Evaluation: 40**
External Evaluation: 60

8. Demonstrate ethical awareness and responsible application of social-psychological knowledge in diverse social contexts.

COURSE OUTCOMES (COs)

Students will be able to:

CO1: Explain major concepts, perspectives and principles of Social Psychology.

CO2: Analyse social cognition, attitudes, attribution and social influence processes underlying social behaviour.

CO3: Evaluate interpersonal relationships and group processes using relevant social-psychological concepts.

CO4: Critically examine contemporary social issues such as prejudice, stereotyping, discrimination, aggression, prosocial behaviour and digital social behaviour.

CO5: Demonstrate the ability to investigate and interpret social behaviour through experiential, observational and field-based learning.

CO6: Apply social-psychological principles to analyse contemporary social problems and develop psychologically informed responses.

UNIT I

Understanding Self and Social Behaviour

Nature and scope of Social Psychology, Methods of Social Psychology, Person and Situation Interaction, Self-concept, Self-esteem, Social Identity, Culture and Social Behaviour, The process of Socialization

Experiential Activities

- Structured observation: Observe social behaviour in a natural or simulated setting and identify relevant person, situation and cultural factors.

University of Jammu
Four Year Innovative Undergraduate Program
(Design Your Degree)
BACHELOR IN ARTS PSYCHOLOGY
Semester V
(For the Session 2026, 2027 & 2028)

Course Code: UMJDPT-512 **Course Title: Social Psychology**
Credits: 04 **Maximum Marks: 100**
Contact Hours: 60 **Internal Evaluation: 40**
External Evaluation: 60

- Case analysis: Analyse a real-life or hypothetical case to understand the influence of social context on behaviour.

- Small-scale inquiry: Conduct a simple observational, interview-based or qualitative inquiry into a selected aspect of social behaviour.

- Reflective analysis: Connect observations or inquiry findings with relevant social-psychological concepts.

UNIT II

Social Cognition and Social Influence

Social Perception, Attribution, Attitudes, Formation and Change of Attitudes, Persuasion. Conformity, Compliance, Obedience, Social Influence in Digital Media

Experiential Activities

- Analysis of social situations: Examine everyday situations to identify social perception, attribution and attitude processes.

- Small-scale empirical activity: Explore an aspect of attitudes, attribution or social influence through an appropriate survey, observation, demonstration or simple experimental activity.

- Simulation/role-play: Experience selected processes of conformity, compliance, obedience or persuasion, followed by discussion and theoretical interpretation.

- Media analysis: Examine advertisements, social-media content or other forms of communication to identify persuasion and social influence processes.

UNIT III

Group Behaviour and Interpersonal Relationships

University of Jammu
Four Year Innovative Undergraduate Program
(Design Your Degree)
BACHELOR IN ARTS PSYCHOLOGY
Semester V
(For the Session 2026, 2027 & 2028)

Course Code: UMJDPT-512 **Course Title: Social Psychology**
Credits: 04 **Maximum Marks: 100**
Contact Hours: 60 **Internal Evaluation: 40**
External Evaluation: 60

Group Dynamics, Leadership, Communication, Cooperation and Competition, Conflict and Conflict Resolution, Interpersonal Attraction, Friendship, Helping Behaviour

Experiential Activities

- Group problem-solving: Participate in a group task to examine cooperation, competition, communication, leadership and decision-making.
- Simulation: Use role-play or simulation to examine interpersonal communication, conflict or conflict resolution.
- Group interaction analysis: Observe or analyse interaction patterns within a group using an appropriate method.
- Sociometric/group mapping activity: Examine interpersonal choices, relationships or interaction patterns in an appropriate group setting.

UNIT IV

Contemporary Social Issues

Prejudice, Stereotypes, Discrimination, Aggression, Prosocial Behaviour, Empathy, Social Responsibility, Social Media and Behaviour, Psychology for Social Change

Experiential Activities

- Community engagement/awareness activity on a selected social issue, with students planning and reflecting on its social-psychological relevance.
- Visit an NGO, school, old-age home, or other appropriate community setting and prepare a field report analysing observed social behaviour using relevant Social Psychology concepts.
- Analyse a contemporary social issue such as cyberbullying, gender bias, road rage, prejudice, discrimination, aggression or misinformation using Social Psychology.

University of Jammu

BACHELOR IN Arts (PSYCHOLOGY)

Semester V

(For the Session 2026, 2027 & 2028)

Course Code: UMJDPT-513 **Course Title: Biological Basis of Behaviour**

Credits: 04 **Maximum Marks: 100**

Contact Hours: 60 **Internal Evaluation: 40**

External Evaluation: 60

COURSE DESCRIPTION

This course introduces students to the biological foundations of human behaviour by exploring how the brain, nervous system, endocrine system, genetics, and physiological processes influence cognition, emotion, motivation, learning, and behaviour. It examines the relationship between biological mechanisms and psychological functioning while highlighting the interaction of heredity and environment in shaping human behaviour.

COURSE OBJECTIVES

By the end of this course, students will be able to:

1. Explain the biological foundations of human behaviour.
2. Describe the organization and functioning of the nervous and endocrine systems.
3. Understand neural communication and brain-behaviour relationships.
4. Examine the biological basis of sensation, perception, motivation, emotion, and sleep.
5. Explore the interaction between genetics, environment, and behaviour.
6. Develop scientific observation and analytical skills through experiential learning.
7. Interpret real-life neurological and psychological conditions from a biological perspective.
8. Appreciate ethical issues in neuroscience and behavioural research.

COURSE OUTCOMES (COs)

Students will be able to:

CO1: Explain the structure and functions of neurons, the nervous system, and endocrine system.

CO2: Describe how different brain structures influence behaviour, cognition, and emotions.

University of Jammu

Four Year Innovative Undergraduate Program

(Design Your Degree)

BACHELOR IN Arts (PSYCHOLOGY)

Semester V

(For the Session 2026, 2027 & 2028)

Course Code: UMJDPT-513 **Course Title: Biological Basis of Behaviour**

Credits: 04 **Maximum Marks: 100**

Contact Hours: 60 **Internal Evaluation: 40**

External Evaluation: 60

CO3: Analyze biological processes underlying motivation, emotion, sleep, and stress.

CO4: Evaluate the interaction of genetics and environment in shaping behaviour.

CO5: Demonstrate understanding through laboratory activities, simulations, case analyses, and reflective exercises.

CO6: Apply biological principles to understand everyday behaviour and mental health

UNIT I

Foundations of Biological Psychology

Introduction to Biological Basis of Behaviour, Nature and Scope of Biological Psychology, Levels of Biological Organization, Genes, Chromosomes and Behaviour, Nature–Nurture Interaction, Structure and Functions of the Neuron, Neural Communication, Neurotransmitters

Experiential Activities

- Neural structure and communication activity: Use physical or digital models to identify major parts of a neuron and explain their functions and neural communication.
- Observation/demonstration of biological responses: Examine a simple reflex or observable behavioural response and relate it to underlying neural mechanisms.
- Case-based analysis: Analyse a selected case illustrating the relationship between biological factors, environmental experience and behaviour.
- Critical reflection/inquiry: Explore how biological and environmental factors interact in shaping a selected aspect of human behaviour.

UNIT II

Brain, Nervous System and Endocrine System

(For the Session 2026, 2027 & 2028)

Course Code: UMJDPT-513 **Course Title: Biological Basis of Behaviour**

Credits: 04 **Maximum Marks: 100**
Contact Hours: 60 **Internal Evaluation: 40**
External Evaluation: 60

Central Nervous System, Peripheral Nervous System, Autonomic Nervous System, Major Brain Structures and Their Functions, Cerebral Cortex, Limbic System, Brain Plasticity, Endocrine System, Hormones and Behaviour

Experiential Activities

- Brain structure activity: Identify and map major brain structures and relate them to basic behavioural and psychological functions using physical or digital models.
- Case analysis: Examine a selected case of brain injury or neurological condition and analyse associated changes in behaviour or psychological functioning.
- Classroom demonstration: Conduct a simple behavioural demonstration, such as reaction-time or response-based activity, and discuss its possible neural basis.
- Brain–behaviour inquiry: Investigate a selected question concerning the relationship between a brain structure/process and behaviour using appropriate academic or digital resources.

UNIT III

Biological Bases of Sensation, Sleep, Motivation and Emotion

Sensory Processes, Vision and Hearing, Biological Rhythms, Circadian Rhythm, Sleep and Dreams, Biological Basis of Hunger, Thirst, Sexual Behaviour, Emotion, Stress Response

Experiential Activities

- Observation/self-monitoring activity: Examine a selected aspect of sleep, biological rhythms or daily physiological patterns and relate observations to relevant biological concepts.
- Sensory demonstration: Conduct an appropriate classroom demonstration of a sensory process such as sensory adaptation and explain the underlying mechanism.

University of Jammu

- Observation and analysis: Analyze emotional expressions or physiological responses using suitable visual, audio or other learning material.

- Case-based inquiry: Examine a selected case or real-life example related to sleep, motivation, emotion or stress and interpret it from a biological perspective.

UNIT IV

Brain, Behaviour and Contemporary Neuroscience,

Learning and Memory, Brain Plasticity, Neurodevelopment, Neuropsychological Disorders, Brain Imaging Techniques, Applications of Neuroscience, Brain Health, Ethics in Brain Research, Future Directions in Behavioural Neuroscience

Experiential Activities

- Case-based analysis: Analyse a selected neurological or neuropsychological condition and examine its biological basis and behavioural manifestations.

- Critical analysis of neuroscience resources: Examine a suitable documentary, research-based article, digital resource or other academic material and identify its major biological and behavioural concepts.

- Application activity: Explore a contemporary application of neuroscience, such as brain plasticity, learning, brain health, neurodevelopment or neuropsychological rehabilitation.

- Group inquiry/presentation: Investigate a contemporary issue in biological psychology and communicate its biological and psychological significance through an appropriate format.

Note: The experiential learning activities listed above are suggestive and not exhaustive. The teacher may select, modify or adapt activities according to the course content, classroom context, student interests, available resources and ethical considerations. Activities should be aligned with the course outcomes and should promote observation, scientific inquiry, biological understanding

BACHELOR IN ARTS (PSYCHOLOGY)
Semester V
(For the Session 2026, 2027 & 2028)

Course Code: UMJDPT-514
Credits: 04
Contact Hours: 60

Course Title: Indian Psychology
Maximum Marks: 100
Internal Evaluation: 40
External Evaluation: 60

COURSE DESCRIPTION

This course introduces students to the rich psychological traditions of India by exploring indigenous perspectives on the mind, consciousness, self, personality, emotions, well-being, and human potential. Drawing from the Vedas, Upanishads, Bhagavad Gita, Yoga, Buddhism, Jainism, and contemporary Indian Psychology, the course integrates ancient wisdom with modern psychological science. Emphasis is placed on experiential learning through meditation, self-reflection, community engagement, case studies, storytelling, and indigenous practices, enabling students to understand psychology as a science of human flourishing and holistic development

COURSE OBJECTIVES

By the end of this course, students will be able to:

1. Explain the scope, nature, and foundations of Indian Psychology.

2. Compare Indian and Western approaches to understanding human behaviour.

3. Examine concepts of self, consciousness, personality, and well-being in Indian traditions.

4. Explore psychological principles embedded in Yoga, Buddhism, Jainism, and the Bhagavad Gita.

5. Apply Indian psychological concepts to mental health, stress management, and personal growth.

6. Develop self-awareness through experiential and reflective practices.

7. Appreciate Indigenous Knowledge Systems in understanding human behaviour.

8. Integrate traditional wisdom with contemporary psychological practice.

COURSE OUTCOMES (COs)

University of Jammu
Four Year Innovative Undergraduate Program
(Design Your Degree)
BACHELOR IN ARTS (PSYCHOLOGY)
Semester V
(For the Session 2026, 2027 & 2028)

Course Code: UMJDPT-514
Credits: 04
Contact Hours: 60

Course Title: Indian Psychology
Maximum Marks: 100
Internal Evaluation: 40
External Evaluation: 60

Students will be able to:

CO1: Explain the historical and philosophical foundations of Indian Psychology.

CO2: Compare Indian and Western perspectives on mind, self, consciousness, and personality.

CO3: Analyze Indian concepts of well-being, emotional regulation, and human development.

CO4: Apply principles of Yoga, mindfulness, and meditation to everyday psychological functioning.

CO5: Demonstrate understanding through experiential activities, field projects, and reflective portfolios

CO6: Appreciate the relevance of Indian Psychology in promoting individual and societal well-being

UNIT I

Foundations of Indian Psychology

Meaning and Scope of Indian Psychology, Sources of Indian Psychology, Indian Knowledge Systems and Psychology, Concept of Mind (Manas), Intellect (Buddhi), Ego (Ahamkara), Consciousness (Chitta), Indian and Western Perspectives on Psychology

Experiential Activities

- Reflective inquiry: focusing on self-concept from Indian perspective.
- Comparative analysis of Indian and western perspective: focusing on understanding developing comparative analysis and critical thinking skills
- Contextual exploration through Visits: focusing on acknowledging psychological ideas in contemporary practices.

Credits: 04 **Maximum Marks: 100**
Contact Hours: 60 **Internal Evaluation: 40**
External Evaluation: 60

- Storytelling and Narrative exploration: focusing on understanding Indian philosophical traditions

UNIT II

Self, Personality and Consciousness

The Self (Atman), Panchakosha Model, Triguna Theory (Sattva, Rajas, Tamas), Personality in Indian Psychology, States of Consciousness, Bhagavad Gita and Psychological Development

Experiential Activities

- Reflective exploration using Triguna framework: focusing on understanding Sattva, Rajas and Tamas
- Guided contemplative exploration: focusing on building attention and awareness
- Panchakosha-based reflective activity: focusing on understanding different dimensions of human functioning and personal growth.
- Text-based exploration of the Bhagavad Gita: focusing on understanding self-regulation, values, action and psychological development.

UNIT III

Indian Approaches to Mental Well-being

Yoga Psychology, Eight Limbs of Yoga, Mindfulness and Vipassana, Buddhist Psychology, Jain Perspective on Behaviour, Emotional Regulation, Stress Management, Resilience, Compassion

Experiential Activities

Internal Evaluation: 40
External Evaluation: 60

- Experiential exploration of breathing and mindfulness practices: focusing on understanding attention, awareness and emotional regulation.
- Reflective meditation diary: focusing on developing self-awareness and reflecting
- Case analysis: focusing on critical thinking and application skills in relation to stress, resilience and emotional regulation.
- Mindfulness based activities: focusing on developing observation, attention and present-moment awareness skills.

UNIT IV

Contemporary Applications of Indian Psychology

Positive Mental Health, Indian Counselling Traditions, Values and Ethics, Spiritual Intelligence, Indian Psychology in Education, Health, Leadership, Community Well-being, Future Directions of Indian Psychology

Experiential Activities

- Interaction with practitioners of Indian psychological and contemplative traditions: focusing on developing interpersonal communication skills.
- Case-based exploration of Indian Psychology in applied settings: focusing on developing critical thinking, case analysis and application of psychological knowledge.
- Design of a campus well-being programme: focusing on developing problem-solving and application skills.
- Creative or digital representation of Indian Psychology in everyday life: focusing on developing communication skills and creativity

Guidelines for Assessment and Evaluation

For

Semesters V - VIII of FYUGP (DYD)

1 Assessment and Evaluation Model

Features of this Model of Assessment and Evaluation are:

- Domain knowledge: Tested through class tests and end-sem examination.
- Creativity: Assignments, seminars, open-ended examination questions.
- Hands-on experience: Practical tasks and project work to build real-world problem-solving skills.

Following scheme of assessment and evaluation shall be followed for the last two years of FYUGP (DYD):

1.1 Continuous Internal Assessment (CIA) - 40 Marks

This ensures sustained engagement and assessment beyond the final exam. CIA shall have the following components:

- Class Tests and Quizzes (10 Marks): This shall focus on concepts clarity, analytical ability comprising 2 or 3 short written or online tests.
- Assignments and Creative Tasks (10 Marks): This shall be focussed on Problem-solving or reflective assignments and Open-ended questions to assess creativity.
- Practical and Hands-on Activities (15 Marks): This shall have the activities like Lab work, field tasks, case study etc.

Semester V
(For the Session 2026, 2027 & 2028)

Course Code: UMJDPT-514 **Course Title: Indian Psychology**
Credits: 04 **Maximum Marks: 100**
Contact Hours: 60 **Internal Evaluation: 40**
External Evaluation: 60

- Seminar and Presentation (5 Marks): This shall have individual or group presentation to be evaluated for communication, originality, creativity, and depth.

1.2 End-Semester Examination - 60 Marks

This is designed to test comprehensive domain knowledge and applications. The question paper shall have three sections:

- Section A - 20 Marks: Short answer questions to test fundamentals and breadth of domain knowledge.
- Section B - 20 Marks: Problem-solving and applications of the domain knowledge. The problems need to be conceptual numerical and case-based related to real world applications.
- Section C - 20 Marks: This is to be devoted to essay/analytical questions (choice-based) and have to be Open-ended, requiring synthesis, critical thinking, and creativity.

Course Objectives

At the end of the practical course, students will be able to:

1. **Apply psychological concepts and methods** to selected real-life and laboratory-based situations.
2. Develop skills in **observation, interviewing, data collection and systematic recording**.
3. Conduct and interpret selected **psychological tasks, assessments and surveys** under appropriate guidance.
4. Organise, analyse and interpret **basic psychological data and findings**.
5. Prepare systematic **practical, case, observation, field and reflective reports**.
6. Demonstrate appropriate **ethical practices** in psychological investigation and reporting.
7. Develop **research, critical-thinking, analytical and communication skills** through practical work.

LIST OF PRACTICALS

Practical 1
A. Sociometry
Students will:

- Administer a suitable **sociometric technique** in an appropriate group setting.
- Record and organize responses.
- Prepare a **sociogram** using an appropriate method.
- Identify basic patterns of **interpersonal relationships, group structure and social preferences**.
- Interpret findings using relevant concepts.

B. Social Identity Mapping
Students will:

- Prepare a **personal social identity map** identifying relevant social groups, roles and affiliations.
- Reflect on how different social identities may influence **self-concept and social behaviour**.
- Prepare a brief report integrating observation and reflection.

Practical 2
Observation of Group Behaviour
Students will systematically observe group interactions in an appropriate setting or through a suitable simulated/classroom situation, focusing on selected aspects such as:

- Leadership
- Cooperation
- Conflict
- Communication
- Participation
- Group roles

Students will:

- Develop an appropriate **observation schedule/checklist**.
- Systematically record observations.

- Organise and interpret the observations using relevant psychological concepts.
- Prepare an **observation report**.

Practical 3
Simple Reaction Time
Students will:

- Conduct a **simple reaction-time task** using an appropriate laboratory apparatus, digital tool or other suitable method.
- Familiarise themselves with the procedure and relevant precautions.
- Record and organise reaction-time observations.
- Calculate/describe relevant basic indicators of performance.
- Interpret the findings in relation to **attention, response processes and individual performance**.
- Prepare a practical report.

Practical 4
Sleep Diary Analysis
Students will:

- Maintain a systematic record of selected **sleep-related behaviours and patterns** for an appropriate observation period.
- Examine aspects such as:
    - Sleep duration
    - Sleep–wake pattern
    - Perceived sleep quality
    - Relevant lifestyle factors
- Organize and analyze the recorded information.
- Examine possible relationships between **sleep patterns, daily activities and psychological functioning**.
- Prepare a **sleep-pattern analysis report**.

Practical 5
Brain Mapping Exercise
Students will use an appropriate **physical, printed or digital brain model** to:

- Identify major brain structures, including:
    - Cerebral cortex
    - Limbic system
    - Brain stem
    - Cerebellum
- Locate and label relevant structures.
- Describe their basic functions.
- Relate selected brain structures to **behaviour and psychological processes**.
- Present their understanding through an appropriate practical record, diagram, model or digital format.

Practical 6
Case Study of Neurological Disorders
Students will undertake a **case-based study of a selected neurological or neuropsychological condition**, such as:

- Parkinson's disease
- Alzheimer's disease

- Stroke
- Epilepsy
- Traumatic brain injury
- Any other appropriate condition

The case study should include, as appropriate:

- Brief description of the condition
- Relevant biological/neural mechanisms
- Major behavioural and psychological manifestations
- Impact on cognitive, emotional or behavioural functioning
- Analysis of the brain–behaviour relationship
- Appropriate psychological interpretation

Students will prepare a **structured case analysis/report**.
Cases may be drawn from suitable academic sources, published case material or appropriately anonymized material. Personal identifying information should not be collected or reported.

Practical 7
Meditation and Mindfulness Diary & Triguna Personality Reflection
Students will engage in a **guided mindfulness, meditation or breathing-based activity** and systematically reflect on selected aspects of psychological functioning, such as:

- Mood
- Attention
- Perceived stress
- Sleep
- Emotional or behavioural awareness

Students may also explore the **Triguna framework—Sattva, Rajas and Tamas—as a culturally grounded framework for self-reflection**.
The activity will involve:

- Appropriate guided practice or observation.
- Systematic recording of subjective experiences.
- Reflection on changes or patterns observed.
- Exploration of behavioural tendencies through the **Triguna framework**.
- Preparation of a reflective report.

Practical 8
Interview Study
Students will conduct a **structured or semi-structured interview** with an appropriately selected individual relevant to psychology or human well-being, such as a:

- Psychologist
- Counsellor
- Yoga or meditation practitioner
- Social worker
- Other appropriate professional/practitioner

The interview should focus on a **clearly defined psychological theme or area of practice**.
Students will:

- Develop an appropriate interview schedule.
- Obtain informed consent where required.
- Conduct and document the interview ethically.
- Organise and analyse relevant information.
- Relate responses to appropriate psychological concepts.

- Prepare an **interview report**.

The professional, mode of interview (face-to-face/online) and specific topic may be selected according to availability, relevance and ethical considerations.

GENERAL GUIDELINES FOR PRACTICAL WORK

The practical activities listed above are suggestive and not exhaustive. The teacher may select, modify or adapt the procedures, settings, tools and modes of practical work according to the course content, classroom context, student interests, available resources and ethical considerations. Practical work should be aligned with the course outcomes and should promote systematic observation, data collection, psychological inquiry, application of psychological concepts, analysis and interpretation of findings, critical reflection, report writing and communication of learning.

All practical work should maintain appropriate standards of:

- Informed consent, wherever applicable
- Confidentiality and privacy
- Anonymisation of personal information
- Non-harm and respect for participants
- Appropriate use of psychological tools and techniques
- Responsible interpretation and reporting of findings

University of Jammu

Four Year Innovative Undergraduate Program

(Design Your Degree)

BACHELOR IN PSYCHOLOGY

Semester V

(For the Session 2026, 2027 & 2028)

Course Code: UMJDPP-517

Course Title: Project 1 (Cross Disciplinary)

Credits: 06

Maximum Marks: 150

Internal Evaluation: 100

External Evaluation: 50

Guidelines for Interdisciplinary Major Projects

To promote experiential learning, skill development and local to global relevance in line with the essence of the DYD program, one semester long major project carrying 150 marks from semesters V to VIII shall be undertaken. The project should cover more than one subjects in the domain area of major. The project shall be Cross disciplinary in nature.

1. Objectives

1. Integrate theoretical knowledge within the discipline.
2. Encourage research-oriented and inquiry-driven learning.
3. Develop analytical, digital, and communication competencies.
4. local, regional, or global developmental challenges.
5. Enhance employability and innovation skills.

2. Nature and Scope of Projects

Projects may include interdisciplinary academic research, mathematical or computational modelling, design thinking and technological solutions, community engagement initiatives, policy analysis or educational innovation and entrepreneurship or sustainability-focused projects. Each project must clearly demonstrate integration of at least two courses of the current semester. Transdisciplinary project in collaboration are also encouraged.

3. Structure and Supervision

A group of 3-5 students shall work on the project where interdisciplinary team formation is encouraged. One Primary Mentors shall guide the project at least one from another discipline(s)/course(s) may be appointed where required. The project shall be conducted over one semester with the following suggested indicators:

- Proposal Development and Approval
- Literature Review and Conceptual Framework
- Methodology Design
- Implementation/Analysis

- Mid-Term Review
- Final Report Submission
- Presentation and Viva-Voce

4. Proposal Guidelines

Each project proposal shall include

- Title and thematic area.
- Courses/disciplines integrated.
- Problem statement and motivation.
- Objectives and expected outcomes.
- Brief literature review.
- Methodology and tools.
- Timeline with milestones.
- Ethical considerations (if applicable).

Approval shall be granted by the DYD Academic/Project Committee.

5. Evaluation Scheme (Credits-6) Marks: 150

A. Continuous Assessment – 40 Marks

Proposal quality and originality	10
Literature review	10
Methodology planning	10
Progress, logbook & mentor assessment	10

B. Final Report – 60 Marks

Problem formulation and clarity	10
Interdisciplinary integration	10
Methodology and analysis	20
Innovation and societal/technological relevance	10
Writing quality and references	10

C. Presentation & Viva Voce – 50 Marks

Conceptual understanding	15
Implementation/results/outcome	15

Communication skills	5
Response to questions	10
Collaboration/team work	5

Students shall submit a hardbound copy of the project report, along with a soft copy containing the PDF of the report and all relevant datasets, source code, and design artefacts. In addition, students must submit the presentation slides prepared for the project evaluation and a duly maintained project diary/logbook certified by the mentor(s).

6. Academic Integrity and Ethics

To meet academic integrity and professional ethics , proper citation and avoidance of plagiarism are mandatory. Also responsible use of AI tools must be declared.

7. Role of the DYD Project Committee

The committee shall approve project proposals, ensure interdisciplinary balance, monitor the progress, standardize evaluation procedures and maintain a repository of DYD projects.

8. Timeline of the Project:

The project work is required to be initiated in the following phases:

- Week 1-3: Proposal preparation and approval
- Week 4-6: Literature review, data collection and methodology
- Week 8-12: Implementation/Analysis
- Week 13: Final submission and viva-voce.

9. Outcomes:

By the end of 8th semester, the students shall have atleast any one of the following outcomes:

a) Application for Intellectual Property Rights (IPR) such as design patent, copyright, etc.

b) Submission of a high-quality research article in a Scopus / SCI / SCIE indexed journal, with the manuscript accepted for review/publication.

c) Conversion of the idea into a start-up, including submission of an application to an incubator for start-up support.

15. Academic Integrity and Ethics

To meet academic integrity and professional ethics , proper citation and avoidance of plagiarism are mandatory. Also responsible use of AI tools must be declared.

16. Role of the DYD Project Committee

The committee shall approve project proposals, ensure interdisciplinary balance, monitor the progress, standardize evaluation procedures and maintain a repository of DYD projects.

17. Timeline of the Project:

The project work is required to be initiated in the following phases:

- Week 1-3: Proposal preparation and approval
- Week 4-6: Literature review, data collection and methodology
- Week 8-12: Implementation/Analysis
- Week 13: Final submission and viva-voce.

18. Outcomes:

By the end of 8th semester, the students shall have atleast any one of the following outcomes:

a) Application for Intellectual Property Rights (IPR) such as design patent, copyright, etc.

b) Submission of a high-quality research article in a Scopus / SCI / SCIE indexed journal, with the manuscript accepted for review/publication.

c) Conversion of the idea into a start-up, including submission of an application to an incubator for start-up support.

Recommended Guidelines for DYD Internship PSYCHOLOGY

1. Purpose of the Internship

The internship is designed to provide students with **first-hand exposure to child development, inclusive education, therapeutic environments, behavioural processes, family support, and professional practices** in a Child Development Centre.

The emphasis should be on:

- Experiential learning
- Systematic observation
- Understanding individual differences
- Developing empathy and sensitivity
- Connecting classroom learning with field experience
- Developing professional and interpersonal skills
- Understanding the importance of multidisciplinary approaches
- Reflecting on personal and professional growth

2. Duration and Attendance

The students will attend the internship for 6 weeks :

- Students must complete the prescribed number of internship days/hours.
- Attendance should be maintained daily.
- Students should report on time and follow the working hours of the Centre.
- Leave should be taken only with prior permission from the Centre supervisor and Faculty Mentor.
- Students should maintain a **Daily Internship Logbook**.
- Regular attendance and participation should be considered during evaluation.

3. Orientation Before Internship

Before students enter the Centre, the **Faculty Mentor should conduct an orientation session** covering:

A. Understanding the Centre

Students should know:

- Nature and purpose of the Child Development Centre
- Services provided
- Professional staff and their roles
- Types of programmes conducted
- Basic principles of inclusive and child-centred practice

B. Ethical Orientation

Students must understand:

- Confidentiality
- Privacy
- Informed consent
- Professional boundaries
- Respect for dignity
- Non-discrimination
- Appropriate communication
- Responsible use of photographs and social media

C. Safety Orientation

Students should be briefed about:

- Child safety
- Emergency procedures
- Appropriate physical interaction
- Handling difficult behaviours
- Reporting concerns to supervisors
- What to do if a child becomes distressed or unwell

4. Student Code of Conduct

Students should maintain a **professional, respectful and child-friendly attitude** throughout the internship.

Students MUST:

- Dress appropriately and professionally.
- Be punctual.
- Use respectful language.
- Treat every child with dignity.
- Follow instructions of Centre professionals.
- Maintain confidentiality.
- Ask permission before participating in activities.
- Maintain appropriate professional boundaries.
- Record observations objectively.
- Seek guidance whenever they are unsure.

Students MUST NOT:

- Diagnose any child.
- Use labels or derogatory language.
- Conduct psychological testing independently.
- Provide therapy independently.
- Counsel parents independently.
- Give medical or psychological advice.
- Discuss a child's condition with other children or visitors.
- Share confidential information.
- Take photographs/videos without permission.
- Upload photographs, videos or information about children on social media.

- Exchange personal contact details with children/families.
- Promise outcomes to parents or children.

5. Confidentiality and Anonymity

This should be a **mandatory component** of the internship.

Students should **never mention the child's name** in:

- Internship report
- Daily log
- Reflective journal
- Presentation
- Photographs
- Case descriptions
- Assignments

Instead, students may use neutral identifiers such as:

- Child A
- Child B
- Participant 1
- Student X

However, even these identifiers should not be accompanied by information that could indirectly identify the child.

Example

Not appropriate:
"Rohan, an 8-year-old child from XYZ School, showed..."

✅ **Appropriate:**
"One child in the classroom demonstrated difficulty sustaining attention during structured activities."

The focus should remain on **behaviour and observation rather than identity**.

6. What Students Should Observe

Students should be trained to observe **without judging or diagnosing**.

They can observe:

Child Behaviour

- Attention
- Engagement
- Communication
- Emotional expression

- Response to instructions
- Social interaction
- Play behaviour
- Participation
- Adaptive behaviour
- Response to changes in routine

Learning

- Ability to follow instructions
- Interest in activities
- Learning preferences
- Response to reinforcement
- Task completion
- Participation in group activities

Communication

- Verbal communication
- Non-verbal communication
- Gestures
- Eye contact where appropriate
- Expression of needs
- Response to others

Social Behaviour

- Peer interaction
- Sharing
- Turn-taking
- Cooperation
- Seeking help
- Participation in group activities

7. Observation vs Diagnosis

This distinction should be explicitly explained to students.

Avoid:

"The child is hyperactive and has ADHD."

Prefer:

"The child frequently moved away from the assigned activity and required repeated prompts to return to the task."

Avoid:

"The child has poor intelligence."

Prefer:

"The child required additional time and repeated instructions to complete the assigned activity."

This will teach students **scientific and non-stigmatizing observation**.

8. Exposure to Different Disabilities

Students may be exposed to children with different developmental, behavioural, learning, communication or physical needs.

The purpose is **not to diagnose or clinically evaluate them**, but to understand:

- Functional difficulties
- Individual strengths
- Communication needs
- Learning requirements
- Environmental barriers
- Support strategies
- Inclusive practices
- Role of professionals
- Importance of family involvement

Students may encounter:

- Autism Spectrum Disorder
- ADHD
- Down Syndrome
- Intellectual Disability
- Cerebral Palsy
- Specific Learning Disabilities
- Hearing Impairment
- Speech and Language Difficulties
- Multiple Disabilities

Important guideline

Students should **not attempt to determine whether a child has a particular disorder** based on their own observations.

8. Exposure to Therapy Sessions

Students may observe therapy sessions **only with permission from the Centre/professional and according to Centre policy**.

Depending on the Centre, exposure may include:

- Speech and language intervention
- Occupational therapy

- Physiotherapy
- Behavioural intervention
- Special education
- Play-based activities
- Social skills activities
- Sensory activities
- Parent guidance

Students should observe:

1. Objective of the activity
2. Method used
3. Child's response
4. Role of the professional
5. Adaptations made
6. Communication style
7. Reinforcement strategies
8. How progress is monitored

They should **not imitate or independently conduct professional interventions**.

9. Participation in Activities

Students may participate in activities **under supervision**.

Suggested activities:

- Storytelling
- Art and craft
- Drawing
- Music and movement
- Structured play
- Group activities
- Puzzles
- Games
- Classroom assistance
- Social interaction activities
- Awareness activities
- Celebration of special days

10. Daily Internship Logbook

Every student should maintain a daily record.

A suggested format is:

Component	Details
Date	
Internship Hours	

Component	Details
Activities Observed	
Activities Participated In	
Key Observations	
Interaction with Children	
Professional Practices Observed	
What I Learned	
Challenges Encountered	
How I Responded	
Reflection of the Day	
Supervisor's Signature	

Important

Students should **not copy the same observation every day**. Each day's entry should demonstrate a new learning experience.

11. Reflective Journal

The reflective journal should go beyond describing what happened.

Students should answer:

What did I observe?

What did I learn?

Why was it important?

How did I feel?

What challenged my assumptions?

What would I do differently next time?

Which psychological concept does this relate to?

This will make the internship genuinely **experiential and reflective**, rather than merely descriptive.

12. Linking Internship with DYD Academic Learning

Students should explicitly connect their field experience with classroom learning.

Developmental Psychology

- Developmental milestones

- Individual differences
- Cognitive development
- Social-emotional development

Positive Psychology

- Strengths
- Resilience
- Well-being
- Positive emotions
- Hope
- Strength-based approaches

Social Psychology

- Social interaction
- Attitudes
- Stereotyping
- Stigma
- Inclusion
- Group behaviour

Biological Basis of Behaviour

- Brain-behaviour relationship
- Neurodevelopment
- Sensory and motor functioning

Personality

- Individual differences
- Temperament
- Behavioural patterns
- Person-environment interaction

Indian Psychology

- Compassion
- Mindfulness
- Holistic development
- Dignity
- Interconnectedness
- Acceptance

Students should not merely write:

"This relates to Developmental Psychology."

They should explain **how and why** the experience relates to the concept.

13. Role of the Faculty Mentor

The Faculty Mentor should:

- Conduct pre-internship orientation.
- Coordinate with the Centre.
- Explain ethical guidelines.
- Monitor attendance and progress.
- Review logbooks periodically.
- Address student concerns.
- Encourage reflective learning.
- Visit/contact the Centre when appropriate.
- Evaluate the final report.
- Conduct/participate in viva and presentation.
